Mission

The Economic Development Advisory Board seeks to:

Foster appropriate economic growth to:

expand the tax base to support Town programs and services; and increase the amount of commercial property so that the commercial taxes can constitute a greater percentage of the overall tax base.

Promote the vitality of our commercial areas.

We pursue these objectives within a framework that recognizes dearly-held Town values about preserving and enhancing the character of neighborhoods, appreciating diversity and the role of affordable housing in maintaining that character, historic preservation, open space, and high quality schools and other Town services.
